1. COMPANY PRESENTATION

1.1. About IMPACT

The company is one of the first companies active in real estate development in Romania, being founded in 1991 by public subscription.

In 1995, the Company has introduced the concept of residential assembly on the Romanian market and therefore it gradually transformed into a pure real estate developer. Starting in 1996, the company is listed on the Bucharest Stock Exchange (BVB).

In 2006, the company's shares were promoted to the first category of the Stock Exchange, becoming the **first** company in the real estate and construction sector which has done so. Since January 2015, the company is part of the **Premium** category, pursuant to the new segmentation of local capital market.

In the past 24 years IMPACT Developer & Contractor has completed **17 small and medium projects**, which included over **3,000 homes** and over 25,00 square meters of offices and business areas.

On 31st of December 2015, the company was involved in residential developments located in four cities in the country, each project with different sizes and found in different stages of completion. Activitatea IMPACT is dominated by a major project: **GREENFIELD residential assembly** in Bucharest.

2014 represented the year of IMPACT relaunching in the residential development sector.

Thus, in November 2014 the launch of the newest neighborhood in GREENFIELD, **Salcamilor assembly** took place. Today it consists of 35 buildings with GF + 5, 924 apartments respectively with 2, 3 or 4 bedrooms. Salcamilor assembly completes the GREENFIELD complex, joining the five existing districts - Blue, Rubin, Topaz, Onix and Quartz.

Nevertheless, documentation was prepared for the commencement of construction of another 39 blocks, which will represent **Platanior Assembly**, with 888 apartments, which will be completed this year starting with the 4th trimester.

The company's management follows the market trends and appropriately responds to any changes in demand and very quickly adapts to market changes.

IMPACT constantly endeavors all efforts to prove its customer focus by aligning to the specific needs thereof. By default, IMPACT proves a high level of adaptability to market conditions; it manages the existing realities and identifies resources for exploration of new business opportunities. To this end, the company's management continually seeks trends and market developments, so that the urban concepts of innovation products it offers, to ensure recognition of IMPACT Developer & Contractor as leader of the real estate market on local level, with focus on Romania's capital, Bucharest.

After seven years of declining, the real estate market began to slightly rebound in 2015, being the year in which the price of apartments began to return to growth. End of this year shows that the market trend is growing, given that the number of acquisitions of housing is higher than the previous year. Analysts say that these are the first signs of a possible recovery of the real estate market.

Another study on real estate market, cited by Agerpres, shows that, in some areas, increase in the price of apartments has even exceeded the 10% threshold. The cited study shows that the largest housing price increases were recorded this year in Cluj, Timisoara and Suceava and discounts were reported in Sibiu, Resita and Focsani. Thus, among the most expensive cities, relative to the price of apartments, are Cluj-Napoca, Bucharest and Constanta and the cheapest homes are in Resita, Targoviste, Satu Mare and Zalau.

End of year results clearly show that in 2015 the volume of transactions nationwide was better than last year.

Market data show that some of the most spectacular real estate developments are still found in Bucharest.

By analyzing the official data of the National Statistics Institute (INS), we find that housing delivery in 2015 are superior to those of the boom in 2008, when 10 192 units were completed. Analysts said the large number of homes delivered shows that the market is thawing and during the crisis developers continued to work.

„The main developers on the Romanian market, which during the crisis, the prices lowering, between 2009-2012, were among the few who have built, have gained experience, they understood very well the market and today dominate the residential constructio " , Matei Malos said.

3.2. Strategic Directions and Activities Guidelines of IMPACT in 2015

2015 was marked on the one hand by the completion of the first stage consisting of 9 blocks with 252 apartments in the new residential developments in Salcamilor assembly, located in the GREENFIELD district, and on the other hand, by the start of three new production cycles (26 blocks with 672 apartments) related to Salcamilor assembly (Stage 2 in spring, and steps 4 and 3 had started in the summer and fall of 2015).

Since the spring of 2015 it has started the signing of contracts of sale and delivery of homes to new owners. Sales have continued at a rapid pace until the end of the year.

During 2015 there were reservations and promises of sale signed as of steps 1, 2 and 4 of Salcamilor assembly, in an increasingly intense pace. On 31st of December 2015 340 contracts of sale were signed in Salcamilor assembly and 138 promises and reservations, contracting degree of the first 3 stages of development on sale, being of almost 50%.

The development plan for 2015 was accelerated to prevent the existing demand in the market.

In terms of Greenfield neighborhood, management objective is that in the spring and summer of 2016 to start construction of the new residential assembly in Greenfield neighborhood - Platanilor, which will include 39 blocks and about 888 apartments.

Another major goal of the company in 2016 is launching technical documentation for development of a new residential project in Bucharest in the Ghencea Extension - Bd. Timisoara, where the company owns a land area of approximately 26 ha.

Also, in 2015 it began the analysis, preparation and realization of the project design documentation of Barbu Vacarescu Ave., a project that started in September 2014 with the acquisition of ownership over a land area of 2.6 ha.

Also, the company's activity is focused on preparing the necessary documentation for Greenfield Plaza urban center building, with a total area of 10,400 square meters, which will include a spa, shops and services of approximately 8,000 sqm and an administrative headquarters of 2,400 sqm.

The company intends accelerating the production cycles and product standardization, so IMPACT offer to adjust to market demand, these being the main concerns of the management in the current period, in order to achieve sales objectives and profitability.

To finance residential developments, in addition to its own sources of funding - reinvested profit, it aims to co-finance development costs through bank loans.

Also for assisting the development and financing of the mentioned projects, the company has proposed obtaining financing on the capital market up to RON 135 million by issuing corporate bonds. In this regard the General Assembly of 7^{to} of November 2015

approved the modification of the conditions of the bond issue and the company's management began efforts to achieve the prospectus.

3.3. Main objectives of IMPACT in 2015:

➤ **Vanzarea locuintelor finalizate in Bucuresti, Ploiesti, Oradea si Constanta;**

In 2015, there were 388 houses and apartments sold, with a built developed area of 31.622 sq.m.

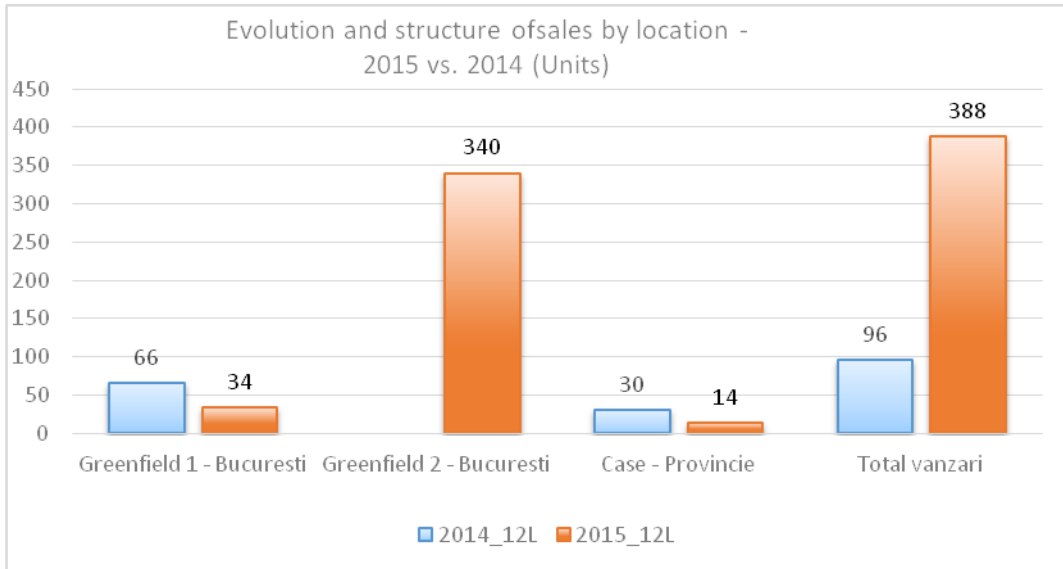

Housing sales were achieved in:

- Bucharest - GREENFIELD 2 - Salcamilor Assembly : 340 apartments
- Bucharest - GREENFIELD 1 - 34 apartments
- other neighborhoods in the country: 14 houses.

Compared to 2014, a significant increase was recorded in the sales of apartments in GREENFIELD, as result of completion of residential developments started by Impact in the summer of 2014 -- SALCAMILOR assemblies 1 and 2 (18 buildings and 504 apartments).

GREENFIELD sales growth was favored by the residential new product's quality as well as by the benefits offered by the residential assembly, which together have created a competitive advantage for the buyer. Also, buyers increased appetite associated with increased interest shown by the banks on granted financing favored sales increasing.

Given that the number of units sold in 2015 compared to 2014 considerably increased, the built sold area also proportionately increased by approximately 22,000 sqm.

- **Providing the sale of plots of land to individuals and legal entities for the development of homes or small commercial areas.**

In 2015 land plots were sold in 37.624 sqm land area in Ploiesti, Volunteer, Constanta, Oradea and Bucharest.

Compared to 2014, sales of plots of land have increased 3 times, mainly on account of intense and sustained sales activities embodied in liquidating lands portfolio of the project in Ploiesti (an area of more than 28,000 sqm).

➤ **Less lease contracts and sale of leased housings**

Leasing activity of the apartments is no longer a priority for the company in recent years. Most dwellings of which leases have ended in 2015, were sold so that the number of rented homes fell from 21 homes in late December 2014, to 8 homes in late December 2015.

➤ **Continuation of the production cycle, by commencing the works in a new residential development stage in GREENFIELD neighborhood**

In April 2015 work started on the 2nd phase of Salcamilor assembly, with a built area of 22,000 sqm and 9 blocks with 252 apartments, phase completed in November 2015.

The work for the 3rd and 4th stage of Salcamilor assembly, totaling other 420 apartments, started in the summer of 2015 and it will be completed in the first half of 2016. Salcamilor assembly is composed of 35 blocks with 924 apartments.

GREENFIELD district's development strategy is the following:

- A new concept for ground floor apartments - they benefit from a tennis court beside the apartments that will be purchased with the apartment;
- To each new residential development a dedicated parking area for visitors is assigned, so that each apartment is assigned an undivided share of visitor car parks;
- Indoor traffic roads of the assembly are allocated in undivided share to each apartment and are transferred to future owners.

3.4. Strategic directions for the sale of portfolio projects in 2015

As a result of the changes that were recorded in the real estate market in the past four years, in 2015, IMPACT has continued to make changes in its operational activities, aiming at the best possible adaptation to current market conditions.

In the past two years, the main priority of the company was more efficient exploitation of portfolio dwellings.

IMPACT mainly concentrated on selling homes at the expense of renting them, in order to increase company liquidity. This explains the low number of rentals in 2015.

The economic situation in recent years has influenced the level of consumer confidence, along with increased expectations in terms of quality of the living environment.

The considerable increase in sales in GREENFIELD (from 66 in 2014 to 374 units in 2015), was favored by increased appetite of the buyers in the new post crisis economic climate, by the price adjustment to the new features of the market, but also by the greater promotion of products and interest on granted financing manifested by banks.

3.5. Strategic directions for the sale of land plots in the portfolio

In 2015, the company has searched for solutions to boost sales of plots of land for building houses. In this respect, there were put on sale viable / ongoing viability plots for construction of houses in Bucharest, Voluntari, Ploiesti, Constanta and Oradea.

A plot of land of about 2 hectares owned by the company in Constanta was dismantled in 48 lots for homes, which are already on sale. These plots are near the Boreal villas assembly developed by IMPACT.

3.6 2015 budgeted versus achieved comparison

Sales budget for 2015 has a deviation of 29%, both in quantity and value.

The approved Sales plan was the following:

- 71 units of old stock of buildings
- 450 units in new developments
- 43,340 sqm of land plots in Constanta, Ploiesti, Oradea and Bucharest.

Sales budget of old stock had a deviation of about 28% due to provincial decreased appetite for houses, and buyers' preferences in Greenfield for new apartments.

In terms of new development, due to the authorization documents that were obtained late, plus some delays from contractors, the company has not finalized the timing budgeted construction of 252 apartments in phase 2 of the Salcamilor assembly, thus their trading in fiscal year 2015 was not in line with the budget. We mention that at the end of 2015 the company recorded a total of 138 buildings reserved in Salcamilor assembly, phase 2.

In 2015 there were sold plots of land in area of 37 624 sq m in Ploiesti, Voluntari, Oradea and Bucharest, more than half of the sold plots of land were in Ploiesti, deviation registered to the budget is 67%, being generated from non-performance of sales in Constanta.

The appetite for land acquisition is further reduced, the company makes an effort to make them viable and to accelerate their sales process.

Significant variations to the budget were registered in:

- 8% increase in expenditure on administration of projects based on works carried out in Greenfield District I: recovery against property, waterproofing restoration;
- 11.5% increase in administrative costs, in particular due to commencement of the production flow;
- The company recorded provisions for ANAF litigation, in the net amount of RON 17.2 mill., amount which has not been budgeted.
